

Modified ICS-213 Directions:

The DR# is designated as the event number. Either the EOC or the American Red Cross will designate a DR#. Use their number.

The MSG# Field is filled out by the amateur operator. The message number is in the following format:

00001-A initial message going out or coming in. The sending station specifies the number.

00001-B A response to the initial message. The replies back and forth should continue with -C, -D, etc.

00002-A Consists of the next message sent...and so on and so on.

The rest of the form is filled out exactly per the NIMS instructions.

Message notes:

- Although the operator does not have to fill out the entire form, please ensure that before you accept the form, that it is legible.
- By utilizing ICS-213, we empower our served agencies and free up valuable amateur resources.
